Atlas of the renewables energies in Mozambique	Based on the objectives identified in the " New and Renewable Energy Development Policy", identification, location, characterization and evaluation of the potential of renewable resources have become a priority in Mozambique. To achieve this goal, this project conducted a mapping of the following potential sources of renewable energy: Solar, wind, water , hydro, geothermal, biomass / MSW and wave energy. This mapping is intended to be a basis for consultation and work for all renewable energy projects that will be developed in Mozambique.	370,00	-	Disbursed	No	Yes	Funding of research and development and demonstration projects for reducing emissions and for adaptation;	Financial Support Policy;	FUNAE (Moçambique)	Revenues used to fight climate change in developing countries through implementation of projects concerning mitigation and/or adaptation in the context of article 10 of 2003/87/CE. Portugal has financed projects in partner countries , namely Portuguese Speaking countries in Africa and Timor Leste.
Installation of photovoltaic systems in 50 villages	The project is to provide 50 remote villages, covering all provinces of Mozambique, with solar PV systems in schools and health centers and associated housing (teachers and nurses) that will allow basic access to electricity in a way to allow not only illumination but also refrigerators for vaccines and water pumping systems, thus given access to health and education to the population that does not have these resources. The project also provides training for local technicians to maintain the systems.	1 409,00	-	Disbursed	No	Yes	Funding of research and development and demonstration projects for reducing emissions and for adaptation;	Financial Support Policy;	FUNAE (Moçambique)	Revenues used to fight climate change in developing countries through implementation of projects concerning mitigation and/or adaptation in the context of article 10 of 2003/87/CE.
