## 1. INTRODUCTION

The present Participation Report is based on the information gathered from the EUROPEAN**MOBILITYWEEK** 2019 participants' database.

To visualise the campaign's development, the Participation Report compares the 2019 figures with previous editions of the campaign.

Website visits and usage are analysed, providing an insight into the digital reach of the campaign. Social media interaction, a prominent communication tool, is also examined from a statistical standpoint.

Section number 6, 'Highlights and main events', is based on information obtained from award applications of towns and cities that showed excellence and creativity in organising the campaign.

EUROPEAN**MOBILITYWEEK** 2019 had the highest participation rate ever witnessed since its launch in 2002 (3,135 participating towns and cities), surpassing the record set by the previous year's campaign.

## 2. PARTICIPATION

EUROPEANMOBILITYWEEK 2019 marks the fourth year in a row in which the campaign has broken the participation record, with 3,135 towns and cities from 50 countries taking part in the campaign – an increase of 343 towns and cities from 2018.

### 2.1 Participation by country

50 countries took part in the campaign, a decrease of four from 2018.

As in previous years, Spain, Austria and Hungary were the top three countries in terms of participation. The top spot this year went to Spain, registering 89 more cities than in 2018. In second place was Austria, which secured the spot despite seeing a decline in registrations from 559 in 2018 to 519 in 2019. In third place was Hungary, which saw an increase in registrations from 266 to 292.

Besides these three, there were some remarkable showings from elsewhere, with Russia doubling its 2018 participation figures – 132 in 2018 to 264 in 2019.

There were also marked improvements in participation levels over last year in several countries, including Poland (+42), Turkey (+38), Germany (+27), Greece (+24), Portugal (+13), Belarus (+12), the United Kingdom (+9), and Sweden (+9).

Overall, 17 countries broke previous records, a figure that includes two newcomers to the campaign too (Iran and Uzbekistan).

Furthermore, 22 countries improved upon or equalled last year's participation figures.

Quantitatively speaking, not all countries enjoyed the same success they experienced

in recent years. The most significant decline was seen in Austria (-40), Ukraine (-30), Moldova (-17), Belgium (-12), Romania (-7) and Croatia (-6), and negligible amounts in the Czech Republic (-4), France (-3) and Bulgaria (-2). Denmark, regrettably was again absent from the campaign in 2019.

Additionally, this year saw less countries participating in the campaign (50) in comparison to last year's (54). The following 8 countries opted not to participate in this year's campaign: Andorra, Mexico, Moldova, Mongolia, Peru, San Marino, South Africa, and USA.

Comparison of recent years participation per country (in alphabetical order)											
	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019

NB: Green=increase, Red=decrease (top three increase/decrease highlighted in filled cell)

<sup>1</sup>This designation is without prejudice to positions on status, and is in line with UNSCR 1244 and the ICJ Opinion on the Kosovo Declaration of Independence

<sup>2</sup> It is important to note that the totals listed here may vary slightly in comparison to the numbers listed on the website. This being due to duplicated and incorrect participate profiles.

## 2.2 Golden Participants and Participants by country

The table below shows the number of ‘Golden Participants’– those towns and cities that met the three participation criteria of EUROPEANMOBILITYWEEK:

- held events during the week of 16-22 September;
- implemented at least one new permanent measure in the last 12 months;
- hosted Car-Free Day.

‘Participants’ are those that met at least one of the criteria.

2019 saw 72 more Golden Participants than in 2018. However, despite this, the ratio between Golden Participants and Participants still remained below 20 percent, suggesting less chose to address mobility more substantively.

The top three countries with the most Golden participants were Spain (161), Poland (59), and Hungary (54).

Other standout countries (where more than half were Golden Participants) include: Turkey (39/64), Croatia (8/10), Iceland (4/4), Estonia (3/5), Montenegro (3/5), Ecuador (2/2), Brazil (1/1), Colombia (1/1), and Iran (1/1).

Those seeing less than 10 percent include: Argentina (0/3), Austria (9/519), Belgium (0/85), Cyprus (0/4), Finland (1/25), France (2/52), Georgia (0/1), Japan (0/13), Kazakhstan (0/1), Kosovo (1/15), Lithuania (1/60), Russia (22/264), Slovenia (4/80), South Korea (0/2), and Sweden (3/62).

Despite the overall fluctuating participation figures, the percentage of ‘Golden Participants’ remains broadly constant.

Country	Golden Participants	Participants	Total number of towns and cities participating
	(towns and cities that met all three criteria)	(those that carried out at least one of the criteria)	
Albania	2	7	9
Argentina	0	3	3
Austria	9	510	519
Belarus	20	58	78
Belgium	0	85	85

<b>Total (2019)</b>	<b>608 (19.39%)</b>	<b>2527 (80.6%)</b>	<b>3135</b>
<b>Total (2018)</b>	<b>536 (19.2%)</b>	<b>2256 (80.8%)</b>	<b>2792</b>
<b>Total (2017)</b>	<b>542 (21.46%)</b>	<b>1984 (78.54%)</b>	<b>2526</b>
<b>Total (2016)</b>	<b>465 (19.16%)</b>	<b>1962 (80.84%)</b>	<b>2427</b>
<b>Total (2015)</b>	<b>372 (19.86%)</b>	<b>1501 (80.14%)</b>	<b>1873</b>
<b>Total (2014)</b>	<b>377 (18.73%)</b>	<b>1630 (80.97%)</b>	<b>2013</b>

## 2.3 Organisation of Car-Free Day activities

2019 saw an increase in Car-Free Day participation, with 1,374 towns and cities (of a total of 3,135) closing their street(s) to road traffic and opening them to people and sustainable modes of transport – 221 more than in 2018. In 2019, Car-Free Day (22 September) fell on a Sunday.

Organisation of Car-Free Day activities	
Year	Total
2019	1374
2018	1153
2017	1352
2016	953
2015	906
2014	783
2013	730
2012	1114
2011	792
2010	864
2009	909
2008	1281
2007	1254
2006	1310
2005	1452
2004	1394
2003	1488
2002	1742
2001	1477
2000	1262

According to the above chart, although participation does not reach the levels of 2002 and was in steady decline until 2012, generally the trend remains upwards since the all-time low reached in 2013.

In addition, the decline experienced in 2018 has been overcome in 2019, adding to the general upward trend.

Further investigation reveals, however, that there is considerable fluctuation in towns and cities' year-to-year participation: just 600 towns and cities participated in Car-Free day in both 2018 and 2019, while 155 that participated in 2018 chose not to participate in 2019.

The following table reveals the level of involvement, by country. There were only two countries – Georgia and Kazakhstan - where no town or city organised a Car-Free day in 2019.

The top three countries with the most registered Car-Free Days were: Spain (245), Hungary (227), and Russia (186).

Other strong performers (where 75 percent or more of their total participate in Car-Free Day) include: Bosnia and Herzegovina, Brazil, Colombia, Croatia, Cyprus, Ecuador, Hungary, Iceland, Iran, Malta, Montenegro, Republic of North Macedonia, Uzbekistan, and Turkey.

Conversely, the weakest performers (where participation is below 15 percent) include: Austria, Finland, France, Lithuania, The Netherlands, Slovenia, and Sweden.

	Country	Registered Car-Free Days vs Total Registration (in brackets)
1.	Spain	245 (561)
2.	Hungary	227 (292)
3.	Russia	186 (264)
4.	Poland	109 (202)
5.	Portugal	77 (108)

45.	Iran	1 (1)
46.	Uzbekistan	1 (1)
47.	Brazil	1 (1)
48.	Colombia	1 (1)

## 3. PERMANENT MEASURES

### 3.1 Results from the online classification

During EUROPEANMOBILITYWEEK 2019, 15,613 permanent measures<sup>3</sup> were implemented by participating towns and cities, a huge increase of 6,765 compared with 2018 and the highest since we began monitoring seven years ago – perhaps not surprising, given the record levels of participation.

On average, 4.98 measures per city were implemented, a figure which not only beats the 2019 figure of 3.17, but also sets a new record (the last record was set in 2014 and stood at 4.22 measures per city).

The most popular permanent measures were in the fields of:

- **Accessibility**, such as lowering and enlarging pavements, creating wheelchair ramps, or removingf architectonic barriers (*2,875 measures implemented*).
- **Mobility management**, such as launching awareness-raising campaigns, preparing educational materials, or organising regular fora or surveys on public opinions and ideas (*2,802 measures implemented*).
- **New or improved bicycle facilities**, including enhancement of bicycle networks and facilities, such as bicycle stands in public areas, and the creation of public bicycle or bicycle sharing schemes (*2,411 measures implemented*).

---

<sup>3</sup> Although the term "permanent" measure is used, the category simply reflects measures that continue to have a positive effect outside of the week itself and includes installed infrastructure or equipment, launched new services or regulations, and/or adopted mobility plans

<b>Subtotal</b>	<b>1792</b>	<b>1965</b>	<b>1966</b>	<b>1214</b>	<b>1527</b>	<b>1585</b>	<b>1565</b>	<b>2802</b>
<b>Total permanent measures</b>	<b>7717</b>	<b>8035</b>	<b>8543</b>	<b>5657</b>	<b>7386</b>	<b>7993</b>	<b>8847</b>	<b>15,613</b>
Permanent measures per city with all cities taken into account	3.57	4.16	4.22	3.02	3.04	3.16	3.17	4.98
Number of cities that have implemented at least one permanent measure	1103	906	1032	799	1229	1074	1001	1224
	(51%)	(46.92%)	(51.23%)	(42.66%)	(50.66%)	(42.52%)	(35.85%)	(39.04%)

1,224 towns and cities (of 3,135) declared that they had implemented at least one permanent measure (see penultimate row in the above table). Although this figure is only 5 short of the 2016 record high of 1,229, when calculated as a percentage of all participating cities, the number is less impressive. This figure equates to around 39 percent of all participating cities, which although better than 2018, is the second lowest in seven years, percentage wise.

### 3.2 Top ten permanent measures implemented

Rank*	Permanent measures	# registered in 2019
1.	NEW OR IMPROVED BICYCLE FACILITIES: <b>Improvement of bicycle network</b>	815
2.	PEDESTRIANISATION: <b>Improvement of infrastructure</b>	759
3.	NEW OR IMPROVED BICYCLE FACILITIES: <b>Improvement of bicycle facilities</b>	654
4.	PEDESTRIANISATION: <b>Creation or enlargement of pedestrian areas</b>	601
5.	TRAFFIC CALMING AND ACCESS CONTROL SCHEMES: <b>Speed reduction programmes in zones near schools</b>	519
6.	MOBILITY MANAGEMENT: <b>Launch of awareness-raising campaigns</b>	468
7.	ACCESSIBILITY: <b>Lowering of pavements</b>	452
8.	ACCESSIBILITY: <b>Enlargement of pavements</b>	448
9.	NEW FORMS OF VEHICLE USE AND OWNERSHIP: <b>Charging points for electric vehicles</b>	426
10.	ACCESSIBILITY: <b>Creation of wheelchair ramps</b>	424

In terms of year-on-year activity vis-à-vis the permanent measure categories, there is some slight change, with ‘Creation or enlargement of pedestrian areas’ growing in popularity. Additionally, ‘Removal of architectonic barriers,’ fell again from the top ten, being replaced with ‘Charging points for electric vehicles’. Cycling and pedestrianisation measures grew in popularity, while accessibility measures continued to see steady growth.

## 4. WEBSITE VISITS AND USAGE

September 2019 saw 45,306 unique visitors to the website, a figure, which is lower than 2018's figure of 61,625 unique visitors. These visitors accessed the website a total of 78,411 times, which equates to approximately 1.73 visits per visitor. This compares to 1.44 visits per visitor in 2018. Additionally, the approximate number of pages viewed per visit in 2019 is 4.5 pages per visit, in comparison to 2.89 pages per visit in 2018.

This tells us that although there were less unique visitors in comparison to 2018, they visited the website more often and viewed more pages on the website in comparison to 2018. Therefore, although the total number of visits declined, the level of interaction increased.

Monday 16 September saw the highest level of traffic to the site, with 8,703 unique visitors recorded - the highest number observed in a single day during 2019.

It should be noted that many countries now have national EUROPEANMOBILITYWEEK websites, meaning the central website may not be the first port of call for many web-users interested in the campaign.

Month	Unique visitors	Number of visits
January 2019	7,879	13,339
February 2019	6,594	11,899
March 2019	8,095	15,364
April 2019	7,962	15,490
May 2019	8,881	16,619
June 2019	9,810	17,932
July 2019	11,750	22,068
August 2019	15,600	30,234
September 2019	45,306	78,411

Aside from the homepage, 'Registered **MOBILITYACTIONS**' emerged as the most popular page to visit. Unsurprisingly, given the growth in popularity **MOBILITYACTIONS** saw over the year – at the time of writing, 1,028 actions from 56 countries registered in 2019, compared to 2018, which saw 721 registered actions in 49 countries.

## Registered actions

### MOBILITYACTIONS 2019 (1028 actions in 56 countries)

 Albania	10
 Argentina	3
 Australia	2
 Austria	4
 Belarus	2
 Belgium	17

2015

The top 10 pages in terms of views during September can be seen below:

Ten most visited pages (September 2019)		
Rank	Page	Unique page views
1.	Home	17,629
2.	Registered <b>MOBILITYACTIONS</b>	9,147
3.	Theme 2019	2,718
4.	News	1,993
5.	Campaign resources for 2019	1,948
6.	Communication toolkit	1,758
7.	2019 participants	1,608
8.	About the campaign	1,359
9.	Registrations	1,160
10.	<b>MOBILITYACTIONS</b>	1,105

## 4.1 Where are website visitors from?

Italy surpassed Spain to reach the top of the table in 2019, with 8,489 visitors. Portugal dropped again from 3<sup>rd</sup> place to 6<sup>th</sup>, while new entries to the top 10 included Turkey (3,938) and Greece (2,404).

Despite being the top performers in terms of towns and cities taking part, Austria and Hungary did not fall within the top 10 for website visitors.

Rank	Country	Visits September 2019	Visits September 2018
1.	Italy	8,489	6,293 (2)
2.	Spain	7,231	7,438 (1)
3.	Turkey	3,938	-
4.	France	3,533	2,674 (5)
5.	Slovakia	2,729	1,950 (10)
6.	Portugal	2,711	2,852 (3)
7.	Germany	2,485	2,005 (9)
8.	Belgium	2,453	2,713 (4)
9.	Greece	2,404	-
10.	Poland	2,310	2,100 (8)

## 4.2 Comparison with previous editions

From 2015-2017, we saw a growing number of unique visitors accessing the website, reaching a peak in 2017 at 76,232 visitors. Since then, the number of unique visitors visiting the website has declined and is currently less than the figure reached in 2015. However, we are seeing that the number of page views per visit is increasing year-on-year – 2016: 3.79 pages per visit, 2017: 2.85 pages per visit, 2018: 2.89 pages per visit, and 2019: 4.5 pages per visit. So, although the overall number of unique visitors accessing the website is in decline, we see that those who are accessing the website are engaging with it more than in previous years.

### 4.3 Website referrals

The following table shows the top 10 websites that drove traffic to [www.mobilityweek.eu](http://www.mobilityweek.eu) in September 2019:

Rank	Website	Visits
1.	ww.facebook.com	2926
2.	eurotm2018.eurotm.sk	1882
3.	7000.ru	1053
4.	www.isprambiente.gov.it	750
5.	www.twitter.com	383
6.	registration.mobilityweek.eu	329
7.	www.recs.es	277
8.	www.kleiner-kalender.de	267
9.	mobility-action.mobilityweek.eu	216
10.	www.learningpaths.com	196

Facebook continues to be the strongest referrer to the campaign website, cementing its importance in the campaign's online activities. Twitter also performed well, but fell back to fifth position, where it was in 2017.

Similar to 2018, the Slovak EUROPEAN**MOBILITYWEEK** website appeared in the top three - in 2019 referring the second highest number of visitors.

ISPRA, the Italian institute for environmental protection and research, ranked 4<sup>th</sup> in the 2019 listing and RECS (Red Española de Ciudades Saludables) – the Spanish network of healthy cities ranked 7<sup>th</sup>

The 2019 campaign again saw the registration pages for EUROPEAN**MOBILITYWEEK** and **MOBILITYACTIONS** act as referrers, indicating that visitors are logging on to these registration portals prior to visiting the website.

## 5. SOCIAL MEDIA

### 5.1 Hashtag usage

The following core statistics categories related to hashtag use are referenced:

- **Posts:** the number of posts including one of the specified hashtags
- **Users:** the number of users who used one of the specified hashtags
- **Engagements:** the number of likes, retweets or comments on posts with the specified hashtags
- **Reach:** the number of users that saw at least one post with the specified hashtags
- **Impressions:** the number of times all posts with the specified hashtags were seen. A single user can deliver multiple impressions

#### Comparing hashtag usage from 2018 to 2019

Comparing numbers from previous years, the combined core statistics (posts, users, engagements, reach, and impressions) decreased from 2018 to 2019. The chart on the following page details this. The hashtags used in 2019 were **#WalkWithUs** and **#MobilityWeek**.

Although the combined core statistics are lower in 2019 than in 2018, what we are seeing is that even though less people used the hashtags, those who did had a broader reach and thus a greater impact. Therefore although the quantity of posts generated is lower, the impact they are having is greater. To quantify this – In 2018, each post had an approximate reach of 2,362, whereas in 2019 each post had an approximate reach of 4,105.

It should be noted that the European Secretariat encourages National Coordinators to establish their own social media channels to relay local news. It is presumed that this broad spread of accounts has an effect on the follower rates of the official channels (which are provided primarily in English).

In addition, in many cases the National Coordinators translate the official campaign hashtags into their local languages and use these as opposed to the hashtags in English on their own social media channels. This also has an impact on reporting, as we currently only track hashtags in English.

	#mobilityweek		#WalkWithUs		Combined totals, 2019 <sup>4</sup> (#mobilityweek and #walkwithus)	Total figures - 2018 <sup>5</sup>
	Twitter	Instagram	Twitter	Instagram		
<b>Posts</b>	6,300	570	2,909	115	9,894	22,627
<b>Users</b>	4,476	-	2,075	-	6,551	12,324
<b>Engagements</b>	8,235	24,102	5,234	4,811	42,382	151,554
<b>Reach</b>	26,230,509	-	14,385,605	-	40,616,114	53,460,473
<b>Impressions</b>	49,671,702	-	32,268,977	-	81,940,679	147,718,003

<sup>4</sup> These totals may include duplicates where both hashtags were used

<sup>5</sup> These totals may include duplicates where both hashtags were used

## 5.2 Twitter account

The campaign Twitter account (**@mobilityweek**) has 8,903 followers as of time of writing, an increase of 1,397 from 2018. During the month of September, the account gained 568 followers.

### Twitter followers by country

Twitter users from Spain and Italy made up the highest percentage of followers, coming in at 19 and 11 percent respectively, with Belgium in third place with a 9 percent share. Greece has fallen from the top ten in 2019, with the tenth highest percentage of Twitter followers in 2019 instead coming from Ireland.

Country	
Country name	% of audience
Spain	19% 
Italy	11% 
Belgium	9% 
United Kingdom	8% 
France	7% 
Germany	5% 
United States	3% 
Netherlands	3% 
Turkey	3% 
Ireland	2% 

### Twitter followers by language

English is the most widely used language of followers of the Twitter page, with Spanish and Italian coming in second and third respectively. This is followed by French in fourth and German in fifth.

### Languages

### Twitter followers by gender

In terms of gender balance, the Twitter page is more popular with men than women.

### Gender

### 5.3 Facebook account

At the time of writing, the EUROPEANMOBILITYWEEK Facebook account has 19,325 followers, an increase of 4,412 followers from 2018.

Over the course of the week itself, the campaign’s Facebook account gained 352 followers.

### Facebook followers by gender and age

In terms of gender balance, the page strikes a relatively even balance between men and women (47% women to 51% men). Similar to 2018, the majority of followers are aged between 25 and 34 years of age. However, when compared with the 2018 figures, we see a marginal (1%) increase in popularity among those aged between 45 and 54 years of age.

### Facebook followers by country

Followers of the Facebook page are mostly concentrated in Mediterranean countries, with Italy, Spain, Portugal and Greece taking the top four positions. The top ten largely stayed the same, with the only change being Poland rising to 9<sup>th</sup> position and the United Kingdom dropping to 10<sup>th</sup>.

Facebook followers by country		
	Country	Followers
1.	Italy	3,412
2.	Spain	1,290
3.	Portugal	1,184
4.	Greece	990
5.	Belgium	670
6.	Romania	666
7.	Germany	650
8.	France	574
9.	Poland	481
10.	United Kingdom	458

### Facebook followers by language

English remains the most widely used language among followers of the Facebook page (when “US” and “UK” versions are added), with Italian the second most used language. Spanish and Portuguese follow in the rankings, with Greek, French, and German also popular among followers. In a change to the top 10 in 2019, Polish has fallen from tenth position, with Romanian being the tenth most popular language used among followers of the Facebook page.

Facebook followers by language		
	Country	Followers
1.	Italian	3,366
2.	English (US)	2,733
3.	English (UK)	2,221
4.	Portuguese (Portugal)	1,069
5.	Spanish	930
6.	Greek	842
7.	French	788
8.	Spanish (Spain)	749
9.	German	595
10.	Romanian	451

## 5.4 Instagram account

The EUROPEANMOBILITYWEEK Instagram account was launched in 2018 and since then has grown in strength. The account has 1,003 followers as of time of writing, an increase of 678 from 2018. During the month of September, the account gained 350 followers.

### Instagram followers by country

The top countries in terms of the account's audience mirror that of other social media channels, with Italy and Spain taking the top positions.

### Instagram followers by gender and age

Unlike the campaigns other social media accounts, which tend to show the inverse, the EUROPEANMOBILITYWEEK Instagram account has a marginally greater female following.

**Gender** ⓘ

**Age Range** ⓘ All Men Women

Similar to Facebook, the majority of the followers are aged 25-34 years of age.

## 6. HIGHLIGHTS AND MAIN EVENTS

This section aims to present selected examples of activities which happened in some of the 3,135 towns and cities celebrating EUROPEAN MOBILITY WEEK in 2019. Many activities focused on the annual theme 'Safe Walking and Cycling', with the safety and cycling aspects being more easily promoted. However, there are many very good examples of walking activities.

As a decentralised campaign, towns and cities are responsible for organising their own events in line with the common guidelines, but also taking into account their priorities. It is a real challenge to select only a limited number of good examples from such a high number of local programmes. Input from National Coordinators and local campaigners, as well as the awards applications from towns and cities are a very helpful basis for this selection.

**Cork** (Ireland) held a step challenge for commuters, in association with the National Transport Authority. Commuters who decided to walk to work were rewarded with prizes, like shopping vouchers. In addition, the City challenged people to 'race against Rob', a famous local athlete, in a fun competition.

**Zadar** (Croatia) took it easy by organising relaxed walks, and a slow bike ride for children and adults - an original way of raising awareness among local residents of the need to change their travel behaviours.

**Liepaja** (Latvia) developed a dedicated website to encourage people to walk in and discover one of the city's most famous parks. The project was hugely successful, with many local residents participating.

Cities across Europe took **pedestrian crossings** as an iconic symbol to advocate for increasing walking as a mode of transport in our urban areas. The initiative, which was the brainchild of our German National Coordinator, saw groups of people crossing streets like The Beatles did it in Abbey Road in 1969.

Although the promotion of walking was limited to pedestrian crossings (i.e. wider pavements, car-free zones, nice urban furniture, etc.) this element was used to raise awareness by becoming more visible, attractive, and colourful.

Images from **Igoumenitsa, Pallini** (Greece) and **Barcelona** (Spain)

**Wodzisław Śląski** (Poland) gave a second life to old bicycles. During the week, local residents could donate their old or unused bicycles to the municipality. The bicycles were then repaired by local mechanics and art schools, and redistributed to local residents in need of bicycles. The project made cycling safe and accessible to all.

There is no better opportunity to launch public surveys as part of the Sustainable Urban Mobility Plan (SUMP) process than during EUROPEANMOBILITYWEEK. This was the case in **Šabac** (Serbia), which gathered hundreds of answers.

**Terracina** (Italy) organised a mixture of cultural, leisure and social events to promote walking and cycling, illustrating that partnerships and a good communication strategy are essential for a successful campaign on sustainable urban mobility.

Involving local media is crucial in raising awareness of sustainable mobility. Inspired by this **Banja Luka** (Bosnia and Herzegovina) organised a breakfast with journalists and representatives of the City administration to discuss the theme of ‘Safe Walking and Cycling’. In addition, more than 3,000 people completed a survey to update the data on the modal split in the city.

Image: Press conference on 16 September 2019 in **Zagreb** (Croatia)

**Birmingham** (United Kingdom) converted a section of the iconic A38 Aston Expressway into a paved park, making around 1.6 km of the motorway car free for the first time ever.

On 16 September, the European Secretariat organised the official **Launch Event of EUROPEAN MOBILITY WEEK 2019** in Brussels (Belgium). From 08:00-14:00, the area between the headquarters of the European Commission and the European Council hosted activities, inviting residents and passers-by to ‘Walk with us!’. People could prepare a delicious smoothie, using a bicycle powered smoothie maker, and grab a coffee from a cargo-bike.

In 2019, the event was run in parallel with a roundtable on road safety. The European Commission, alongside European Cities, presented the Global Alliance of NGOs on Road Safety with road safety commitments, and signed “The new paradigm for safe city streets” declaration.

## 7. CONCLUSIONS AND RECOMMENDATIONS

### Participation

#### **Unprecedented participation levels**

(significant increases over 2018 in brackets and non-EU indented):

- Belarus (+12)
- Germany (+27)
- Greece (+24)
- Hungary (+25)
- Kosovo\* (+8)
- Lithuania (+6)
- Poland (+42)
- Portugal (+13)
- Russia (+132)
- Spain (+89)
- Sweden (+9)
- Turkey (+38)

- Norway
- Republic of North Macedonia
- Serbia
- Slovakia
- Slovenia
- Switzerland
- The Netherlands
- United Kingdom

#### **Same as 2018:**

(Non-EU indented)

- Ecuador
- Georgia
- Kazakhstan
- Latvia
- South Korea

#### **Also better than 2018:**

(Non-EU indented):

- Albania
- Bosnia and Herzegovina
- Cyprus
- Finland
- France
- Ireland
- Italy
- Japan
- Lithuania
- Luxembourg
- Malta
- Montenegro

#### **Significant falls**

(in the context of the 2018 result and non-EU indented):

- Austria (-40)
- Belgium (-12)
- Croatia (-6)
- Czech Republic (-4)
- Romania (7)
- Ukraine (-30)
- Moldova (-17)

#### **Notable absentees:**

- Denmark

## Reflections

- Overall, 343 more towns and cities than 2018
- The number of participating countries fell from 54 to 50. The same number as in 2017
- Most levels of unprecedented participation were seen in Central Eastern, and Southern European countries, and in some countries outside of Europe – notably, Russia. Additionally, many countries throughout Europe saw marginal to large increases in participation rates in comparison to 2018 figures.
- **Golden Participants:** 72 more than 2018. However, this still equates to under 20 percent of all participants. Standout countries where more than half of their cities are ‘golden’ include: Turkey (39/64), Croatia (8/10), Iceland (4/4), Estonia (3/5), Montenegro (3/5), Ecuador (2/2), Brazil (1/1), Colombia (1/1), and Iran (1/1).
- **Car-Free Days:** participation increased since 2018, with the figure rising from 1,153 to 1,375. There remains considerable fluctuation in cities’ year-to-year participation, although generally the trend continues upwards since the all-time low reached in 2013. Standout countries where 75 percent or more of their total participated in Car-Free Day include: Bosnia & Herzegovina, Brazil, Colombia, Croatia, Cyprus, Ecuador, Hungary, Iceland, Iran, Malta, Montenegro, Republic of North Macedonia, Uzbekistan, and Turkey. Conversely, the weakest performers (where participation is below 15 percent) include: Austria, Finland, France, Lithuania, The Netherlands, Slovenia, and Sweden
- **Permanent measures:** There was a huge increase in permanent measures, with 6,765 more permanent measures than in 2018 (15,613 vs 8,848) – the highest since we began monitoring in 2012. There was also an increase in the number of cities implementing those, which rose to 1,224, only 5 short of the record high set in 2016. In 2019, this equated to around 39 percent of all participating cities, which although being better than 2018, is the second lowest among the seven years, percentage wise. Thematically speaking, cycling measures, pedestrianisation, and charging points for electric vehicles all saw steady growth.
- **MOBILITYACTIONS:** A rise of 307 actions since 2018: 1028 in 56 countries compared with 721 actions in 49 countries in 2018.

## Conclusions

EUROPEANMOBILITYWEEK remains an integral part of the portfolio, and the flagship campaign, of the European Commission's Directorate General for Transport and Mobility – DG MOVE. It is probably the European Commission's best-known campaign world-wide.

European Commissioner for Transport, Violeta Bulc broadly promoted the campaign while abroad, as an EU success story in the field of sustainable urban mobility:

It was no coincidence that EUROPEANMOBILITYWEEK saw its highest ever participation levels under Violeta Bulc's mandate, as she has always provided her political support and personal involvement in the campaign. Towns and cities have answered her call with commitment and tangible results in the promotion and awareness-raising of sustainable urban mobility at the local level.

Another key reason for the success of the initiative is the well-established network of National Coordinators. The network currently more or less covers the EU, with the exception of Denmark and France. The Czech Republic and Hungary even provide funding to help towns and cities with the organisation of their local campaigns.

The European Secretariat continues to invest funds and time in supporting annual information events in countries that require extra support. Beyond the three annual coordination meetings, with a diverse programme to ensure a good exchange of best practice, the European Secretariat is available for the National Coordinators all year round.

The unexpected popularity of the **MOBILITYACTIONS** has helped to broaden the community of local campaigners, including organisations other than cities.

The European Secretariat ensures that the campaign stays relevant and topical by linking it with the most pressing global issues faced by local actors: the fight against climate change, within the framework of the European Green Deal; the challenge of new mobility services and micromobility, including e-scooters; and the importance of making sustainable transport accessible and affordable for all.

## Recommendations

- Share and exchange experience and place increased focus on less active countries where National Coordination structures are not fully engaged (i.e. Bulgaria, Denmark, France, Italy and Romania)
- Put in place a strategy to ensure a smooth transition in the National Coordinators' structures to make them less dependent on individuals
- Maintain a presence at relevant urban mobility events (i.e. EU Urban Mobility Days, EUROCITIES Mobility Forum, POLIS Conference, etc.)
- Recognise the decentralised approach of the campaign, respecting the different priorities in the different regions of Europe, while sharing a common message
- Improve the timing of the delivery of campaign materials
- Act as a knowledge exchange platform for all local campaigners, not only National Coordinators, especially taking into account the popularity of **MOBILITYACTIONS**
- Encourage the implementation of permanent measures
- Keep the campaign fresh by having a new theme each year
