

# Relatório sobre a utilização das receitas geradas pela venda em leilão de licenças de emissão

**2020**

SUBMETIDO À COMISSÃO EUROPEIA NO ÂMBITO DO REGULAMENTO GOVERNAÇÃO  
DA UNIÃO DA ENERGIA E DA AÇÃO CLIMÁTICA

## Enquadramento

No âmbito da implementação do regime do Comércio Europeu de Licenças de Emissão<sup>1</sup>, Portugal tem direito a um montante de licenças para colocar em leilão. Existem dois tipos de licenças: as designadas licenças de emissão gerais no âmbito das atividades industriais de energia e industriais (licenças gerais), e as licenças de emissão da aviação no âmbito das atividades de aviação, que sendo distintas são leiloadas separadamente. A totalidade das receitas geradas pela venda em leilão das licenças destinadas a Portugal constituem receita do [Fundo Ambiental](#).

Apresenta-se o Relatório que foi apresentado à Comissão Europeia sobre a utilização de receitas geradas pela venda em leilão de licenças de emissão relativo a 2020 dando cumprimento ao n.º 2 do artigo 19.º do Regulamento da Governação de Energia e Ação Climática<sup>2</sup>, e que segue o modelo que consta do anexo II do Regulamento de Execução (EU) 2020/1208 da Comissão<sup>3</sup>, sendo composto por:

- Quadro 1a: Indicação do valor das receitas da venda em leilão das licenças de emissão no ano X-1 com distinção entre o leilão das licenças gerais e da aviação;
- Quadro 2: Indicação do valor total de receitas que foram utilizadas em conformidade com os artigos 3.º-D (aviação) e 10.º (instalações) da Diretiva 2003/87/CE ao nível nacional;
- Quadro 3: Indicação do valor total de receita utilizada para efeitos internacionais (para apoiar países terceiros e países em desenvolvimento);
- Quadro 4: Indicação do valor de receita utilizada com o intuito de apoiar países em desenvolvimento através de canais multilaterais;
- Quadro 5: Indicação do valor de receita utilizado para apoio bilateral ou regional para países em desenvolvimento;
- Quadro 6: Informações complementares sobre a utilização das receitas a nível nacional, por tipo de despesa, que os Estados-Membros podem fornecer

---

<sup>1</sup> Estabelecido pela [Diretiva 2003/87/CE](#), do Parlamento Europeu e do Conselho, de 13 de outubro, na sua atual redação, sendo aplicável a instalações fixas do setor da energia e indústria, bem como ao setor da aviação. Constitui um dos principais instrumentos das políticas de mitigação de emissões de gases com efeito de estufa estabelecidas pela União Europeia para combater as alterações climáticas.

<sup>2</sup> [Regulamento \(UE\) 2018/1999](#) do Parlamento Europeu e do Conselho, de 11 de dezembro de 2018

<sup>3</sup> [Regulamento de Execução \(UE\) 2020/1208](#) da Comissão, de 7 de agosto de 2020, relativo à estrutura, ao modelo, ao processo de apresentação e à análise das informações comunicadas pelos Estados-Membros em conformidade com o Regulamento (UE) 2018/1999 do Parlamento Europeu e do Conselho

## Destques do relatório

- 98% das receitas obtidas por Portugal pela venda em leilão das licenças de emissão foram alocadas a promover um desenvolvimento assente numa economia competitiva e de baixo carbono e para o financiamento da política climática nacional, no cumprimento dos compromissos nacionais em matéria de alterações climáticas. Foram também utilizadas para apoiar projetos que visam reduzir as emissões de gases com efeito de estufa ou que visam proceder à adaptação dos territórios e sociedades aos efeitos inevitáveis das alterações climáticas;
- Em 2020, foi utilizada uma receita de 251 328,74494 Euros;
- 99,1% das receitas utilizadas serviram para financiar projetos a nível nacional;
- O apoio a países em desenvolvimento foi efetuado por intermédio de apoio bilateral, sendo na sua maioria providenciado a Países Africanos de Língua Oficial Portuguesa (PALOP);

Purpose for which revenues were used Revenues	Short Description	Amount (1000 Euros)	Status	Revenues Pursuant To Article3d	Revenues Pursuant To Article10	Type Of Use <sup>(1)</sup>	Financial Instrument <sup>(2)</sup>	Implementing Agency	Comments
Support for Renewables (SEN)	Promote renewable energy through offsetting part of the extra total special regime generation from renewable energy sources in each year up to 100% of the extra cost, including the additional costs of production of renewable cogeneration in its renewable faction	151 561,410	Disbursed	No	Yes	development of renewable energies to meet the commitment of the Union	financial support policy	Secretary-general for Environment and Climate Action	Note that It's not possible to disaggregate the revenues used from article 3d and article 10. This comment is applicable to all projects listed in this table.
Electric Mobility Support Program in Public Administration (ECO.mob) – first phase (2017-2021)	Promote the decarbonisation and improvement of the environment performance of the Portuguese Public Administration vehicle. The first phase of ECO.mob implies the acquisition of 170 electric vehicles	873,25117	Disbursed	No	Yes	encouragement of a shift to low-emission and public forms of transport	financial support policy	Secretary-general for Environment and Climate Action	not applicable
Electric Mobility Support Program in Public Administration (ECO.mob) – second phase (2018-2022)	Promote the decarbonisation and improvement of the environment performance of the Portuguese Public Administration vehicle. The second phase of ECO.mob implies the acquisition of 200 electric vehicles	863,25544	Disbursed	No	Yes	encouragement of a shift to low-emission and public forms of transport	financial support policy	Secretary-general for Environment and Climate Action	not applicable

**Table 2: Use of revenues from auctioning of allowances for domestic and Union purposes pursuant to Articles 3d and 10 of Directive 2003/87/EC**

Purpose for which revenues were used Revenues	Short Description	Amount (1000 Euros)	Status	Revenues Pursuant To Article3d	Revenues Pursuant To Article10	Type Of Use <sup>(1)</sup>	Financial Instrument <sup>(2)</sup>	Implementing Agency	Comments
Expansion Plan for Lisbon subway	Expansion of the subway network of Lisbon	16 678,200	Disbursed	No	Yes	encouragement of a shift to low-emission and public forms of transport	financial support policy	Secretary-general for Environment and Climate Action	not applicable
Expansion Plan for Oporto train network	Expansion of the fast train network of Oporto	35 215,043	Disbursed	No	Yes	encouragement of a shift to low-emission and public forms of transport	financial support policy	Secretary-general for Environment and Climate Action	not applicable
ETS management in Portugal	Administrative expenses of the management of the ETS in Portugal]	10 701,98409	Disbursed	No	Yes	coverage of administrative expenses of the management of the EU ETS	financial support policy	Secretary-general for Environment and Climate Action	In charge of the Portuguese Environment Agency
National Energetic System (SEN) - Windfloat project	Support of the investment related to the installation of the underwater cable connecting to the Windfloat project (Resolution of the Council of Minister n.º 161/2019)	920	Disbursed	No	Yes	development of renewable energies to meet the commitment of the Union	financial support policy	Secretary-general for Environment and Climate Action	not applicable

**Table 2: Use of revenues from auctioning of allowances for domestic and Union purposes pursuant to Articles 3d and 10 of Directive 2003/87/EC**

Purpose for which revenues were used Revenues	Short Description	Amount (1000 Euros)	Status	Revenues Pursuant To Article3d	Revenues Pursuant To Article10	Type Of Use <sup>(1)</sup>	Financial Instrument <sup>(2)</sup>	Implementing Agency	Comments
Windfloat project	Financial support during the operational phase of the Windfloat project	1 214,97432	Disbursed	No	Yes	development of renewable energies to meet the commitment of the Union	financial support policy	Secretary-general for Environment and Climate Action	The WindFloat project consists of the development of a pre-commercial floating offshore wind farm using the WindFloat technology. The project will entail the installation of 25 MW at approximately 20 km off the coast of Portugal. The project is designed for a total lifetime of 25 years. WindFloat is a so-called semi-submersible floating platform inspired by some of the structures employed in the oil and gas industry. The platform is designed to be sufficiently stable to accommodate standard commercially available wind turbines with only minor modifications
Electric urban environmental services vehicles (call n.º 557-A/2017)	Support the replacing of urban environmental services vehicles (example, urban and garden cleaning vehicles) with electric vehicles	235,41546	Disbursed	No	Yes	encouragement of a shift to low-emission and public forms of transport	financial support policy	Secretary-general for Environment and Climate Action	not applicable

**Table 2: Use of revenues from auctioning of allowances for domestic and Union purposes pursuant to Articles 3d and 10 of Directive 2003/87/EC**

Purpose for which revenues were used Revenues	Short Description	Amount (1000 Euros)	Status	Revenues Pursuant To Article3d	Revenues Pursuant To Article10	Type Of Use <sup>(1)</sup>	Financial Instrument <sup>(2)</sup>	Implementing Agency	Comments
Adaptation of the territory to climate change - implementation of the Action Programme for Adaptation to Climate Change (P3AC) (call n.º 12768/2019)	Implementation of adaptation measures foreseen in the Action Programme for Adaptation to Climate Change (P3AC) and in the National Adaptation Strategy in Portugal mainland and in autonomous regions of Azores and Madeira	1 164,74752	Disbursed	No	Yes	adaptation to the impacts of climate change	financial support policy	Secretary-general for Environment and Climate Action	not applicable
Electric Mobility Support Program in Public Administration (ECO.mob) – third phase (2019-2023) (Call n.º 12381/2019)	Promote the decarbonisation and improvement of the environment performance of the Portuguese Public Administration vehicle. The third phase of ECO.mob implies 600 vehicles	450,17334	Disbursed	No	Yes	encouragement of a shift to low-emission and public forms of transport	financial support policy	Secretary-general for Environment and Climate Action	not applicable
Adaptation of the territory to climate change - water resources projects	Implementation of adaptation measures in Portugal foreseen in the National Adaptation Strategy in Portugal mainland to reduce the vulnerabilities and the risk to floods in urban areas	591,35739	Disbursed	No	Yes	adaptation to the impacts of climate change	financial support policy	Secretary-general for Environment and Climate Action	not applicable
Regulation to incentives the introduction of low-emissions vehicles (Order n.º3169/2020)	Incentive for the acquisition of low-emission passenger cars, low-emission light good vehicles and bicycles	3 933,21432	Disbursed	No	Yes	encouragement of a shift to low-emission and public forms of transport	financial support policy	Secretary-general for Environment and Climate Action	not applicable

(1) to be selected:

Categories of uses mentioned in Article 10(3) of Directive 2003/87/EC as follows:

funding of research and development and demonstration projects for reducing emissions and for adaptation;  
 funding of initiatives within the framework of the European Strategic Energy Technology Plan and the European Technology Platforms;  
 development of renewable energies to meet the commitment of the Union;  
 development of other technologies contributing to the transition to a safe and sustainable low-carbon economy;  
 development of technologies that help meet the commitment of the Union to increase energy efficiency;  
 forestry sequestration in the Union;  
 environmentally safe capture and geological storage of CO<sub>2</sub>;  
 encouragement of a shift to low-emission and public forms of transport;  
 financing of research and development in energy efficiency and clean technologies;  
 measures intended to increase energy efficiency and insulation or to provide financial support in order to address social aspects in lower and middle income house-holds;  
 coverage of administrative expenses of the management of the EU ETS;  
 promotion of skill formation and reallocation of labour in order to contribute to a just transition to a low carbon economy;  
 other reduction of greenhouse gas emissions;  
 adaptation to the impacts of climate change;  
 other domestic uses.

Categories mentioned in Article 3d(4) of Directive 2003/87/EC, but not specifically mentioned in Article 10(3) as follows:

funding of common projects to reduce greenhouse gas emissions from the aviation sector;  
 measures to avoid deforestation.

(2) To be selected: fiscal; financial support policy; domestic regulatory policy that leverage financial support; other.

(1) Spending reported in this category could cover the share of spending relevant for ETS sectors reported under the following categories in Table 2:

- (a) development of renewable energies to meet the commitment of the Union;
- (b) development of other technologies contributing to the transition to a safe and sustainable low-carbon economy;
- (c) development of technologies that help meet the commitment of the Union to increase energy efficiency;
- (d) other reduction of greenhouse gas emissions;
- (e) funding of common projects to reduce greenhouse gas emissions from the aviation sector.

**Table 6: Complementary information on domestic use of revenues by type of spending**

(3) Spending reported in this category could cover the share of spending relevant for ETS sectors reported under the following categories in Table 2:

- (a) funding of research and development and demonstration projects for reducing emissions and for adaptation;
- (b) funding of initiatives within the framework of the European Strategic Energy Technology Plan and the European Technology Platforms;
- (c) environmentally safe capture and geological storage of CO<sub>2</sub>;
- (d) financing of research and development in energy efficiency and clean technologies.

(4) Spending reported in this category could cover the share of spending relevant for non-ETS sectors reported under the following categories in Table 2:

- (a) development of renewable energies to meet the commitment of the Union;
- (b) development of other technologies contributing to the transition to a safe and sustainable low-carbon economy;
- (c) development of technologies that help meet the commitment of the Union to increase energy efficiency;
- (d) forestry sequestration in the Union;
- (e) encouragement of a shift to low-emission and public forms of transport;
- (f) measures intended to increase energy efficiency and insulation or to provide financial support in order to address social aspects in lower and middle income house-holds;
- (g) other reduction of greenhouse gas emissions;
- (h) measures to avoid deforestation.
