The Agência Portuguesa do Ambiente, I.P (APA - Portuguese Environmental Agency) would like to express their gratitude to Camões - Instituto da Cooperação e da Língua (Camões - Institute for Cooperation and Language) for their valuable contribution to this report.

# INTRODUCTION

### **GENERAL INFORMATION**

Following the entry into force of the Monitoring Mechanism Regulation (MMR)<sup>1</sup>, Member States shall submit to the Commission, pursuant to Article 16 of the MMR, all relevant information on their financial and technology support provided to developing countries. These reporting provisions are essentially aligned with the requirements of the biennial report to the United Nations Framework for Convention to Climate Change (UNFCCC) for the year 2018. According to number 2 of Article 16 of the MMR, Portugal as an OECD Member State "provides information on financial flows based on the so-called 'Rio markers' for climate change mitigation-related support and climate change adaptation-related support introduced by the OECD Development Assistance Committee and methodological information concerning the implementation of the climate change Rio markers methodology"

From a geographical point of view, and as in previous years, the 2018's Portuguese Official Development Assistance (ptODA) focused mainly in the developing countries which are included in the lusophone universe, in particular the Portuguese Speaking African Countries (PALOP) and the Democratic Republic of East Timor, in accordance with geographical priorities considered on the Portugueses Strategic Concept for Development Co-operation 2014-2020..

The following report intends to provide an overview of the main features of the Portuguese ODA, including bilateral/ geographical/sectoral priorities and multilateral finance disbursements through institutions and/or programmes, projects and actions (PPA).

This report also includes an overview of the projects that were launched under the faststart initiative and that have been extended as well as the levels of finance that are being disbursed in this context, given that their implementation will still continue.

As referred above the statistic information included in this document is based on the DAC/OECD, CRS directives and on the "Rio Markers" for climate change mitigation and adaptation methodology.

# COOPERATION - POLICIES, PRIORITIES AND PROGRAMMES IN PORTUGAL

In 2018, Portugal continued to prioritize cooperation activities towards its partner countries, namely the PALOP and East Timor.

Portugal has a descentralized model of co-operation, which means a permanent intergovernmental and institutionally collaboration, between Camões – Institute for Cooperation and Language, I.P. (in the Ministry of Foreign Affairs) in the capacity of co-operation for development coordinator entity and the Ministry of Environment and Energy Transition (MATE) responsible for the thematic area

The strategic framework and guidelines for development cooperation Programmes, Projects and Actions (PPA) are aligned with the needs and priorities of partner countries. At an institutional level we have established Memoranda of Understanding (MoU) discussed and agreed with partner countries. It should be stressed that it is the partner country that promotes the PPA and presents it to Portuguese Cooperation (PtC) for financing. The partner country is responsible for the selection process of the entity that will execute the PPA, and it happens that in some areas the private sector is better placed to execute them. Therefore the PtC has kept an open door to the private sector engagement working hand in hand with public institutions and/or local communities of the beneficiary/ partner country.

<sup>&</sup>lt;sup>1</sup> Regulation (EU) No 525/2013 of the European Parliament and of the Council of 21 May 2013 on a mechanism for monitoring and reporting greenhouse gas emissions and for reporting other information at national and Union level relevant to climate change and repealing Decision No 280/2004/EC entered into force on the 8<sup>th</sup> of July 2013 upon its publication in the Official Journal (OJ L 165, 18.6.2013, p. 13)

When initiatives or activities include several lusophone countries, the Portuguese Speaking Countries Community (CPLP) Climate Change Network is usually consulted about its interest and relevance. Most of these countries are Least Developed Countries (LDC) and/or Small Island Developing States (SIDS).

### **RIO MARKERS IMPLEMENTATION METHODOLOGY**

As refered in the introduction Portugal, as an Organisation for Economic Co-operation and Development (OECD) country and OECD/DAC member, tracks development financing according to the Creditor Reporting System (CRS) directives. In this regard, the national CRS data reporting is verified by OECD statistical staff, every year.

The OECD/DAC plays a central role on the production of statistics on aid to developing countries from bilateral and multilateral donor agencies every year. The data are published in the OECD website in both formats: aggregated by partner/donor country and disaggregated by activity. Therefore all information regarding Portuguese provision of financial support to non-Annex I Parties can be found in the OECD website. The data are publicly available in the CRS database.

Since 1998 the Development Assistance Committee (DAC) has been monitoring aid targeting the objectives of the Rio Conventions through the CRS using the so-called "Rio markers". The Rio markers on Cilmate Change (CC) Mitigation was established by the DAC in close collaboration with the Secretariat of the UNFCCC. It tracks aid flows that support the implementation of the Convention.

In December 2009, the DAC institut a new marker to also track development finance in support of CC Adaptation. This complements the climate change mitigation marker, and thus allows the presentation of a more comprehensive picture of climate-change-related aid.

These climate markers allow for an assessment of donors' policy objectives in relation to each aid activity. A Principal Objective (Mitigation or Adaptation) score is given when promoting the objectives of the UNFCCC is stated as the main reason for undertaking the activity. Activities marked "significant" have other objectives, but have been formulated or adjusted to meet also climate concerns.

We would like to highlight the participation of the Secretariat of UNFCCC on the discussion undertook by the OECD regarding the establishment and application of "Rio markers" definitions and criteria for eligibility and that the Secretariat of the UNFCCC continues to participate on the ongoing work regarding its improvement.

Regarding transparency procedures all the statistics information reported could be consulted also on the following web link <a href="http://coop.instituto-camoes.pt/bdcoopfrontend">http://coop.instituto-camoes.pt/bdcoopfrontend</a>.

# PORTUGUESE OFFICIAL DEVELOPMENT ASSISTANCE

### **GENERAL INFORMATION**

Portugal's public climate finance (please see table 2) for programs and projects in partner countries is instituted through Official Development Assistance (ODA). In Portugal, ODA for environment has had limited expression regarding total values by virtue of the strategic priorities that essentially lie in areas such as Education, Health, Security and Justice.

Portugal institutionalized the Portuguese Carbon Fund (FPC) as a new source of funding for CC development cooperation in 2010. The FPC is a domestic fund established in 2006 with the main objective of supporting actions at national level to meet the Portuguese commitments under Kyoto Protocol.

Following the publication of Decree-Law 42-A/ 2016 of 12<sup>th</sup> of August which constitutes the Portuguese Environmental Fund (FA), this financial instrument replaces – among others – the FPC. Currently, and according the Order N.º 538-B/ 2017 of 5<sup>th</sup> of January of the Minister of the Environment, the national public body in charge of managing the Environmental Fund is the Secretariat-General of the currently designated Ministry of the Environment and Energy Transition (MATE).

The majority of Portuguese Cooperation climate related PPA includes capacity building components. Neverthless the CRS does not allow data tracking by component.

In this context it should be noted that under the PtC the following amounts on climate change cooperation have been disbursed in 2018 by country (as in table 1 below).

**Table 1**Total amount in 2018 by country
(Bilateral Cooperation – only Principal Objective) Commitments

| Bilateral cooperation |                |
|-----------------------|----------------|
| Angola                | 79 727,00€     |
| Cabo Verde            | 662 344,00€    |
| Cuba                  | 156 762,00 €   |
| Mozambique            | 722 775,00 €   |
| LDC's unspecified     | 20 435,00€     |
| TOTAL                 | 1 642 043,00 € |

Source: Camões, I.P./DPC (2019).

InDecember 2018, bilateral financial flows under Principal Objective amounted to 1 642 043,00€.

Regarding the Portuguese public financial support through the multilateral channels, this is described through the table 2.

Table 2<sup>2</sup>
Provision of public financial support: contribution through multilateral channels in 2018

| Provision of public financial support: contribution through multilateral channels in 2018  Total amount |               |                       |         |           |           |                   |  |                 |                |  |

<sup>&</sup>lt;sup>2</sup> Table 7[a] of the excel file.

 $<sup>^{3}</sup>$  Amounts in USD (OECD Exchange Rate 2018: 1 USD = 0.8473  $\in$ .

### **MITIGATION**

The bilateral projects that had Mitigation as a Principal Objective represent 38,5% of the total CC – mitigation related ODA in 2018.

**Table 3**Climate change related ODA - Mitigation<sup>4</sup>

| YEAR |   | SIGNIFICANT<br>OBJECTIVE | PRINCIPAL<br>OBJECTIVE | BILATERAL ODA<br>TOTAL |
|------|---|--------------------------|------------------------|------------------------|
| 2018 | € | 835 962,00               | 522 394,00             | 1 358 356,00           |
| 2018 | % | 61,5                     | 38,5                   | 100                    |

Source: Camões, I.P./GPPE (2019)

### **ADAPTATION**

In general, Portugal has been paying particular attention to Adaptation to CC, specially its mainstreaming into Development Cooperation (DC), thus seeking to follow international guidelines. Thus the data in table 4 represents the application of Rio Marker's Adaptation to Portuguese ODA.

**Table 4**Climate change related ODA - Adaptation

| YEAR |   | SIGNIFICANT<br>OBJECTIVE | PRINCIPAL<br>OBJECTIVE | BILATERAL ODA<br>TOTAL |
|------|---|--------------------------|------------------------|------------------------|
| 2018 | € | 2 303 124,00             | 1 119 649,00           | 3 422 773,00           |
| 2016 | % | 67,3                     | 33,7                   | 100                    |

Source: Camões, I.P./GPPE (2019)

### STRENGTHENING INSTITUTIONAL CAPACITY

When it comes to Development Cooperation, Portugal has paid special attention to capacity building (please see table 5) at institutional level when prioritizing the PALOP and East Timor in the bilateral context or in the CPLP. This is true both for PPA that are exclusively dedicated to capacity building or when capacity building is a component included in the PPA.

The PPA supported by the PtC usually have a strong technical assistance component with a particular focus on the development of national capacities. Portugal tries to pay special attention to the development committments assumed in Paris, Accra and Busan, especially:

- leadership and control by beneficiaries so they can strategically earmark their resources;
- enhance existing capabilities as a starting point, avoiding the creation of parallel structures and systematically using the national systems for aid implementation;
- technical driven cooperation for the demand of partners.

# **TECHNOLOGY TRANSFER AND INSTITUCIONAL CAPACITY**

### General Information

Concerning technology transfer (please see table 5) and considering the definition formally accepted in the UNFCCC, particularly item c, paragraphs 1 and 5 of Article 4, in several cases a PPA being implemented by the PtC under the context of ODA involves technology transfer, in terms of practices and appropriate processes to each area of the PPA as well as the necessary knowledge to implement these technologies.

<sup>&</sup>lt;sup>4</sup> Committed. Only Principal Objetctive.

Notwithstanding, it becomes difficult to specify a case due to the policy of statistical report of the OECD/DAC that currently does not foresee a marker for the transfer of technology that allows the qualification of the PPA in this perspective or to specifically identify the technology or technologies transferred in each case. However that in the context of the approval process, one of the criteria relates specifically to the issue of technology transfer.

Portuguese cooperative action in the context of tackling CC has increased significantly since the establishment (in 2005) of the Network of CC Offices of CPLP countries, wich seeks the development and implementation of actions in the area of training and cooperation with our partner countries, namely PALOP's.

In this context, the MATE started the promotion of some activities and projects which focused on the transfer of know-how, processes and technology to these countries, in different sectors and aligned with the strategic vision for PtC.

The water and sanitation plus the waste sector have been a recurring commitment of the PtC in the last years. Two worthy examples to highlight this are the projects conducted in Mozambique as well as in Cape Verde, which can be found in table 5.

# PORTUGUESE ENVIRONMENTAL FUND (FA)

### **General Information**

In 2010, the Portuguese Carbon Fund (FPC) opened a funding windowfor the provision of financial flows for the implementation of the fast start commitment of Portugal. Given the increasing interest and impact of the Environment and CC related issues whithin the PtC efforts, an inter-ministerial task force was established following the Copenhagen Conference, composed by the representatives of the Portuguese Ministry of Foreign Affairs and the Ministry of Environment.

Following the publication of Decree-Law 42-A/ 2016 of 12th of August which constitutes the Environmental Fund (FA), this financial instrument replace - among others - the FPC. The main purpose is to support environmental policies for the pursuit of sustainable development objectives, contributing to the achievement of national and international objectives and commitments, in particular those related to CC, water resources, waste and nature conservation, and biodiversity, financing entities, activities or projects that fulfill the following objectives:

- Mitigation of CC through actions that contribute to the reduction of GHG's emissions and achieve of targets, particularly in the field of renewables and energy efficiency in the residential sectors and productive in the case of small and medium-sized enterprises, and in the field of transport;
- 2. Adaptation to CC, specially with actions in the coastal zone and other water resources areas;
- 3. Cooperation in the field of CC, in particular for the fulfillment of international commitments;
- 4. Carbon sequestration;
- 5. Use of the carbon market to meet international goals;
- 6. Promoting the participation of entities in the carbon market;
- 7. Efficient use of water and protection of water resources;
- 8. Sustainability of water services;i) Prevention and redress of environmental damages;
- 9. Compliance with national and community objectives and targets for urban waste management;
- 10. Transition to a circular economy;
- 11. Protection and conservation of nature and biodiversity;
- 12. Environmental awareness and training.

Currently and according national legislation, all the PPA financed by Environment Fund that should account as ODA must have pevious favorable appraisal and approval by Camões, I.P. as co-operation for development coordinatour entity.

The financial flows provided by this Fund are additional to previous sources. The financial contribution of the FPC counts as ODA but is an independent and new source that relies entirely on the Fund's independent and autonomous revenues.

Currently, and according the Order N. $^{\circ}$  538-B/ 2017 of 5<sup>th</sup> of January of the Minister of the Environment, the national public body in charge of managing FA is the Secretariat-General of the Ministry of the Environment and Energy Transition.

# **Examples of Support Through the Environmental Fund**

| Programme or project title  | Recipient<br>country/<br>region | Targeted<br>area | Description of programme or project   |
|---|---------------------------------|------------------|---|
| Community Action<br>Plan for Adaptation<br>in Mozambique –<br>PACA (ex-IPPALAM)<br>– Moçambique | Moçambique                      | Adaptation       | Funded to date by the Ministry of the Environment (through the Portuguese Carbon Fund, currently Environmental Fund), this project aims to increase resilience to the impacts of climate change in 9 Mozambican locations, through the implementation of adaptation measures.   |
| Roadmap of waste<br>in Cape Verde   | Cape Verde                      | Mitigation       | Funded to date by the Ministry of the Environment (through the Portuguese Carbon Fund, currently Environmental Fund), this project aims to map the technologies, locations, methods of collection and to define training actions and the necessary legislative framework in the waste setor for future implementation of projects regarding the reduction of Emissions of Greenhouse Gases (GHGs). The project's promoter is the National Water and Sanitation Agency (ANAS) of Cape Verde and the executor is the consortium led by the Portuguese company Ecovisão, which also includes the public company Águas de Portugal and the Portuguese NGO TESE. |

### New and Addicional Financial Resources

The FPC (current FA) was established with the aim to finance activities/ projects carried out to respond to the challenges of CC and to meet Kyoto Protocol/ UNFCCC objectives, at both domestic and international levels.

Bearing in mind that financing ODA projects is not a core objective of FPC, Portugal considers that the financing provided by FA to activities that aim to promote the economic development and welfare of developing countries is new or additional to the conventional sources of ODA flows (please see table 6).
