

## Resíduos de Pilhas e Acumuladores

De acordo com o n.º 5, do artigo 97.ºA do Unilex, na sua atual redação, a APA, I. P. publicita os resultados de gestão alcançados a nível nacional para cada fluxo específico de resíduos, até cinco dias úteis após a validação pela Comissão Europeia do reporte previsto. As tabelas infra demonstram o resumo do reporte comunitário, efetuado em 2023, para o ano de referência 2021\*.

Tabela 1- Monitorização da conformidade com a Diretiva 2006/66/CE, do Parlamento Europeu e do Conselho, de 6 de setembro, relativa a pilhas e acumuladores e a resíduos de pilhas e acumuladores.

Explanatory footnotes:

2-In Portugal there are not any NiCd batteries and accumulators recyclers. Recyclers abroad don't give information about recycling process. Some information given by PRO is not enough to obtain realistic estimative.

3- In Portugal there are only Lead batteries and accumulators recyclers. Recyclers abroad of other batteries and accumulators don't give information about recycling process. Some information given by PRO is not enough to obtain realistic estimative.

4- Due to the fact that one of the main Portuguese PROs for the batteries and accumulators waste stream (Ecopilhas) started a phasing out process in 2020 and officially left the system (closed for business) in 2021, there were some significant differences in the quantities reported for the year 2020 that still have an impact on the 2021 yearly results now presented. This happens because the other waste management system players had not yet been able to fully compensate for the phasing out and closure of Ecopilhas. For detailed explanation, please read the Quality Reports of 2020 and 2021.

5- Corrected value. The POM results declared to our national authorities where corrected, in 2022, due to an alert given to producers and PROs that stressed the need and legal obligation for the report of real results in any given year.
